

Shyware DPIA Package

Published at <https://shyware.fyi/legal/privacy/dpia/>

This index covers all Data Protection Impact Assessment documents, test evidence, and compliance tooling for the Shyware protocol. All documents are maintained in `patent/mainhub/dpia/` of the Shyware source repository and published here for controller and counsel review.

Evidence Summary

Item	Value
Total assertions passing	379/379 on Stack 4 Node.js, Stack 5 Swift/iOS, and Stack 6 Kotlin/Android
Domains covered	13 (all shyware contract variants; 3 stacks $\times$ 13 domains)
GitHub Actions run	26369476939 (2026-05-24)
Commit SHA	49256fde4f8f0b6cf8a2a2c465fdd8188d8d9202
Infrastructure	Live EC2 + CockroachDB + Cognito + Hyperledger Fabric
Counsel entry point	COUNSEL_BRIEFING.md

Data Processing Agreement

<https://shyware.fyi/legal/privacy/dpia/dpa/>

The Shyware Data Processing Agreement governs how Shyware processes personal data as a processor on behalf of customer controllers. Sub-processor schedules for each role are linked from that page.

Per-domain DPIAs

Domain	Contract	Authority model	Source file
Civic voting	shyvoting-v1	4-party count-match	DPIA_CIVIC_VOTING_REFERENDA.tex
Private value transfer	shywire-v1	4-party count-match	DPIA_PRIVATE_VALUE_TRANSFER.tex
Private chat	shychat-v1	3-party sealer-governed	DPIA_PRIVATE_CHAT_SCYTALE_COMMUNIC

Domain	Contract	Authority model	Source file
Browser analytics	shybrowser-v1	3-party sealer-governed	DPIA_BROWSER_ANALYTICS.tex
Commodity custody	shycustody-v1	4-party count-match	DPIA_COMMODITY_CUSTODY_VAULTS.tex
DAO governance	shyshares-v1	4-party count-match	DPIA_DAO_WALLET_GOVERNANCE.tex
Revenue financing	shycontracts-v1	4-party count-match	DPIA_REVENUE_FINANCING_CONTRACTS.tex
Health record vault (EHR)	shystore-v1	3-party sealer-governed	DPIA_HEALTH_RECORD_VAULT.tex
Credential vault / authenticator	shystore-v1	3-party sealer-governed	DPIA_CREDENTIAL_VAULT_AUTHENTICATOR.tex
Anonymous betting	shybets-v1	4-party count-match	DPIA_BETTING_MARKETS.tex
Informant stream	shyrest-v1	4-party count-match	DPIA_INFORMANT_STREAM_ANONYMOUS_REST.tex
Sealed-bid auction	shylots-v1	4-party count-match	DPIA_SEALED_BID_AUCTION_LOTS.tex
Private video streaming	shystream-v1	3-party sealer-governed	DPIA_PRIVATE_STREAMING.tex

Compliance Tooling

- **Art. 30 Records of Processing generator:** `node scripts/generate-rop.mjs -config shyconfig.json` — generates pre-filled RoP from any deployment's shyconfig manifest. 92 assertions verify correct structure for all 13 contract variants.
- **Retention configuration:** Add `retention` block to `shyconfig.json` to configure `deletion_cron` and populate Art. 30(1)(f).
- **SDK Compliance Guide:** <https://shyware.fyi/legal/compliance/> — operator obligations, DPA obligations, and deployment checklist.

Residual Risk Summary

The following risks are not eliminable by code and require operator governance:

- **Art. 6 lawfulness basis** — operator establishes per deployment, per jurisdiction
- **Art. 9 special category consent** — biometric processing requires explicit consent; some jurisdictions prohibit it
- **Art. 28 sub-processor DPAs** — operator executes with each named provider before processing
- **Three-authority operational separation** — independent keys, separate legal entities, quarterly independent audit
- **Storage limitation cron enforcement** — configurable in shyconfig; operational enforcement is governance

The structurally unfalsifiable residual is authority collusion: full manipulation requires active coordination across the 3–4 structurally separated parties for each embodiment, each generating an independent auditable trail.
